

Pool Structure

Wall sample of our fibreglass pools showing matched quality materials

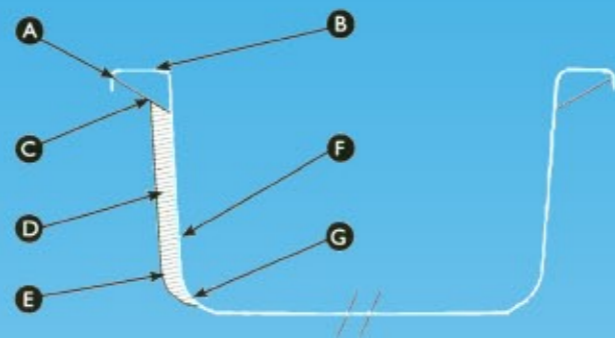

A: Close-beam construction means your pool is built using the strongest method available in the industry.

B: Chemical resistant and U.V stabilised gelcoat (marine grade).

C: Epoxy based vinyl ester resin impervious to water and provides guaranteed osmosis protection.

D: Two structural layers of fibreglass built to the required structural thickness. No fillers added.

E: Special black flowcoat seals any exposed fibres.

A: Outer edge beam.

B: Non slip surface.

C: Angle brace.

D: Fibreglass wall stiffeners.

E: Flowcoat to outer structure.

F: Full depth walls.

G: Large radius designed for auto cleaner.

Based on Freedom Australia's experience in putting pools in all over the world, Freedom New Zealand does not use ceramic fillers for our fibreglass pools. This is due to New Zealand's unique ground conditions.

Over the years, Freedom Pools' high standards of quality and design have been recognised internationally. In Australia, Freedom has been the recipient of many national and state awards. And as recently as 2007, Freedom won the Gold Medal at the SPASA awards, for excellence in Residential Fibre Glass Pools.

All our pools come with a lifetime structural warranty.

SAN REMO

| Heavy duty pump | Telescopic handle |
| Skimmer box | Flotation hose - appropriate length |
| Water test kit | Pool cleaned |
| All connecting pipework | Leaf scoop |
| Vacuum cleaner head | |

NOTE: All sizes and shapes are approximate. Every effort has been made to achieve accuracy. However colour may vary due to manufacturing process.

For nearly three decades Freedom Pools have lead the swimming pool industry with the introduction of many new and innovative ideas in the manufacture of swimming pools.

Now they have introduced a world first - Marble Tech™ a high quality Isothalic Gelcoat finish that looks like marble and is completely different to any other finish available today. Freedom Pools lead the way in fibreglass technology. That's why we've grown to be the largest swimming pool company in Australia.

Marble Tech™ is a high quality Isothalic Gelcoat that offers for the first time, the classic, rich, luxurious look of marble. It is the result of over three years research, development and testing. With its beautiful eye catching decorator colours, it is an affordable world first. Marble Tech™ has revolutionised the fibreglass manufacturing industry.
